Earthquake Early Warning - Student Sheet

Earthquake Basics

An earthquake is _____ _____
It's caused by _____ _____ _____

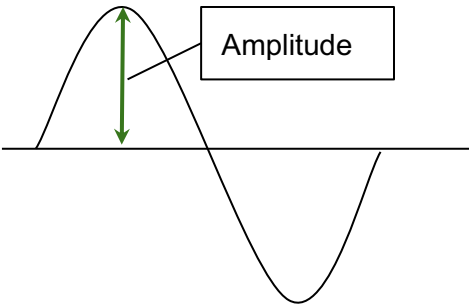

Earthquakes are Waves of Energy

Seismic waves are _____ _____ _____

P-waves move _____ _____ _____ _____ Their speed is _____ _____	<i>My model of a p-wave</i>
--	-----------------------------

S-waves move _____ _____ _____ _____ Their speed is _____ _____	<i>My model of an s-wave</i>
--	------------------------------

Seismic Waves with Different Amounts of Energy

Wave amplitude is _____ _____ _____	
Draw a wave with a low amplitude.	Draw a wave with a high amplitude.
<i>How does the amplitude of the wave affect the amount of shaking?</i> The greater the amplitude, the _____ the shaking. My evidence is _____ _____ _____	
<i>How does the amplitude of the wave change as you get further from the earthquake?</i> The further you are from the spot the earthquake started, the _____ the amplitude becomes. My evidence is _____ _____ _____	

Key Things to Remember

The key things I need to remember to stay safe if there's an alert or if I feel shaking are _____ _____
The most important thing I learned that I will share with my family is _____ _____ _____
