Figure 1. ShakeAlert initial earthquake location (black dot). ANSS earthquake epicenter not available. Polygon approximates outer range for felt ground motion. If shown, red circle is front of peak shaking when the Message was released***. Shaking takes 10 s to expand from circle to circle.

Figure 2. Polygons show the largest contours of estimated shaking intensity. Shaking of MMI 3 or less is often not felt. ANSS earthquake epicenter not available.
