Figure 1. ShakeAlert initial earthquake location (black dot). Star is regional network epicenter. Polygon is the approximate outer range for felt ground motion. If shown\*\*\*, red circle is front of peak shaking when the alert was released. Shaking takes 10 s to expand from circle to circle.

Figure 2. Polygons show shaking intensity contours for the peak magnitude ShakeAlert. Shaking of intensity 3 or less is often not felt. Star shows the regional network epicenter.
